**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **Part III DETAILED ACTION**

#### ***Drawings***

1. The drawings are objected to because the drawings do not show figures 2-5, 7-13 as disclosed in the specification.

Correction is required.

#### ***Specification***

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

Claims 1, 16 and 19 are not adequately supported by the specification. The applicant is required to provide a reasonable explanation of why they feel the specification supports the subject matter as disclosed in claims 1, 16 and 19.

#### ***Allowable Subject Matter***

3. Claims 1-19 would be allowable if rewritten or amended to overcome the specification objection, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reasons for the indication of the allowability of claims 1-19 are the inclusion therein, in combination as currently claimed, of the limitation of a reinforcement bracket comprising: a top interface providing a mating between said bracket and the interior top region of the electrical box; a side interface providing a mating between said bracket and the interior side region of the electrical box; a rigid member providing resistance to a

compressive force applied between said top interface and said side interface (for claims 1-15), a kit comprising: a reinforcement bracket having a top interface providing a mating between said bracket and the interior top region of the electrical box, said bracket further having a side interface providing a mating between said bracket and the interior side region of the electrical box, said bracket additionally including a rigid member providing resistance to a compressive force applied between said top interface and said side interface

(For claims 16-18), and, a method of reinforcing a ceiling electrical box comprising the step of: inserting a reinforcement bracket into the interior of the electrical box, the bracket having a top interface providing a mating between said bracket and the interior top region of the electrical box, the bracket further having a side interface providing a mating between said bracket and the interior side region of the electrical box, the bracket also having a rigid member providing resistance to a compressive force applied between said top interface and said side interface, the bracket further having a mating feature for a fastener (for claim 19). The previously listed limitation is neither disclosed nor taught by the prior art of record, alone or in combination.

***Other prior art cited***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mollick et al, Gretz, Johnson, Johnson et al, Smolik, and Horsley disclose a box similar to applicant's claimed invention.
